

POLICY STATEMENT

The coalition believes it is crucial that the founding cultures and peoples of Canada be given their rightful recognition in the affairs of the nation in all respects. We believe that British culture needs to be promoted and enhanced. We think this is just as fair as allowing for the protections afforded French speaking, populations in Quebec. - A wise policy, in our view.

In view of this, we must ask that immigration cease to be discriminatory against those who originate from the continental European area as that is where we think the protections we are seeking for founding cultures of Canada can be best demonstrated. If we continue as we are to have more immigrants who are not from these areas we are in fact demonstrating that we are being unfair to those who have founded this country and given it what has made it a "paradise on earth" for all to see and desire for themselves as an example of how to live. We must be fair to all concerned. We ask no more! We'd like the Euro as our currency.

We suggest that the English language has been universally adopted as the official language of the world because the culture from which it comes continues to exhibit a fairness and judiciousness, rationality and kindness that all peoples all over the world think right to accept. We would like to have a kindly approach taken to teaching this culture completely to those who will be altogether accepting of such great ideals. To those whose capacities are maximized and done justice to universally if we only preach the kindly message of true generosity, true fairness and kindness so that it comes from the heart to begin with, and is improved and actualized by showing the beauty of Jane Austen and Upstairs Downstairs.

To this end, we advocate a pro-active approach to immigration. We would like to see recognition for the credentials of those professionals such as Doctors from Russia, Ukraine, Romania, etc. We would like incentives such as a free home, furniture and cash rewards to those who we should therefore be much more completely welcoming of in this country and elsewhere. This is how we demonstrate that we can be fair and non-discriminatory in our policies. We must give credit where it is due and not base policies on blind concepts of justice, which equate applicants simply on their fact of existence. This is not "christianly" as many would have us believe but rather is an attempt to demonstrate that ignorance and unfairness can in fact win if we simply choose to allow for this to happen. We say no more of this sort of thinking must exist. Lets do the right thing and reverse this process now!
